

TOP INDUSTRY RATING. HIGHEST QUALITY. LOWEST SYSTEM COST.

NOVARIS

The ONLY RIS that provides all of these important features:

- Contraindications
- User friendly scheduler
- Customizable HL7 utility
- Document scanning directly into patient records
- Built on IHE
- Same database as PACS
- Auto-distribution of reports
- Time stamps and reports on every step of the process

NovaRad's web based NovaRIS revolutionizes the way you run your radiology department by quickly and easily delivering the information you need to monitor department quality, efficiency and profitability. NovaRIS allows you to track patient information, procedures, exam status, revenues and insurance payouts. It also allows you to generate reports based on CPT or revenue codes. Its Admin reports function alerts you to potential problems such as incomplete exams and missing insurance codes. And like all NovaPACS products, NovaRIS seamlessly integrates with your PACS or HIS.

When it comes to maximizing department productivity, NovaRIS pays for itself by letting you track exact reimbursement costs, which insurance companies pay for what and which procedures make or lose money. It can even track the productivity of individual radiology techs.

Workflow Averaging

Tracks average time for each step in the workflow. For example, how long are patients waiting in the waiting room? How long until the radiologist report is available in the PACS?

Modality Activity / Cost

Track how well you are utilizing each modality

CPT Code Cost Averaging

Gives the average revenue per CPT code. Find out where you are making the most money.

PRICING

The NovaPACS pricing model is specifically designed to help hospitals and radiology centers realize a remarkably fast return on their investment. All software and hardware is included in a single price, and fees are based on a subscription model corresponding to a hospital's annual image loads. Customers normally achieve a return on their NovaPACS investment in less than one year.

Scheduling

Easy to use, schedule, cancel, change and manage by modality. All modalities available in scheduler. Quick schedule wizard allows for appointment to be scheduled in seconds. Changes are quick and easy to make. Auto first available date and time. Conflict checking. Customizable recurring events feature. Can easily schedule one or multiple events. Easy to use. Easy check status. Scheduler tells you current status of patient – at a glance.

Dictation / Voice Recognition

NovaRad provides workstation based speech mikes and voice recognition software so reports can easily and efficiently get completed and into the PACS.

Billing Interface

NovaRad provides a bi-direction HL7 interface to your current billing software. All the needed information for billing is transmitted to the billing company. This provides a seamless workflow cycle, bills are sent and financial information is sent back to the RIS.

Mammo Tracking

NovaRad provides an integrated solution with MRSys Mammo Tracking software to aid in data collection, produce basic patient result letters and recall letters and statistical reports. It incorporates the Breast Imaging Reporting and Data System (BI-RADS) of the American College of Radiology, Copyright 2003.

Document Scan

NovaRIS includes the RIS scanning module which can upload scanned information into the patient record. Patient documents can be scanned in on a flatbed scanner and then be accessed through the patient record.

Reports

NovaRIS exists to help radiology departments, imaging centers, and clinics become more efficient and save money. Management Reports help managers know where there is waste and where improvements can be made. Some of the NovaRIS reports are as follows:

Referring Physician Totals

Who is sending you referrals? How are your sales reps doing? Why did a certain referring physician all of the sudden stop sending patients? This is the kind of information that can help you grow your business.

Referring Physician Exams

Filter by modality and know which referring physicians are sending which type of exam.

Cancelled Exams

Tracks patient cancellations.

OTHER PRODUCTS

NovaPACS

A complete, feature-rich PACS designed for hospitals and imaging centers. NovaPACS is easy to install, easy to use, and easy to interface. It is powerful, web-based, and provides enterprise tools throughout the network.

Billing Software

NovaRad provides billing software that is fully interfaced with NovaRIS. Billing software does automated coding, internal edits, electronic claims, remittance, and status checks, insurance/patient tickler files, and i-pay.

Digitizer

NovaRad provides a film digitizer and workstation so old films can easily be put into the PACS and RIS. Includes DICOM Query, multi sheet scan, direct routing to PACS, and does film or paper scan from one workstation.

Computed Radiography

NovaRad re-sells industry known and trusted Konica, Kodak and AGFA computed radiography devices.

NOVARIS FEATURES

- Ease and portability of being web-based
- Utilizes NovaPACS standard intuitive user interface
- Integration to NovaPACS
- Specialized worklist and interface for administrative assistants, technologists, radiologists, transcriptionists, billing specialists, etc.
- Reports analyzing exams, profitability, and insurance billing
- Electronic signature for radiologists
- Reports accessible from NovaPACS enterprise products
- Bar coding
- HIPAA logging
- HL7 interfaces
- DICOM modality worklist
- Patient data tracking
- Billing Interface
- CPT code tracking
- ICD9 codes
- Exam tracking
- Edit manager
- Practice analysis tools and reports
- Scheduling
- Edit secondary insurance
- Availability of patient demographic information
- Table of insurance carriers and information
- Remote administration
- Paperless oriented management
- Access control based on user profiles
- Audit trail
- Patient registration
- Patient personal data management
- Automatic report creation
- Possibility to add further examination
- Automatic report print
- Flexibility in patient data management
- Statistics
- Radiology and technologist charting
- User trails
- IHE profiles
- Scheduled workflow
- Single point of data entry
- Data validation
- Scheduling wizard
- Patient notes are communicated from front desk to attendants
- On-the-fly email and/or fax sending of reports
- Management reports
- Field validation of inputted information
- Storage of patient documents (i.e. copy of DL, etc.)
- Template exams and standard procedures
- Multiple modality scheduling

SECOND PARTY ENDORSEMENT

"The integration between NovaPACS and NovaRIS is unbelievable. Most PACS that I have worked with are so fragile when it comes to adding modalities or any kind of outside connectivity. NovaPACS is like a modality sponge, it absorbs the modality with no connectivity issues."

North Baldwin Infirmary, Bay Minette, AL - Dan Huffmaster, Director of Radiology,
